教學設計摘要：請概述您如何運用《學術英語 Power Up》單元融入教學（約 200 字）			
I started from a picture description as this is a skill focused on this semester. Then I used some strategies from describing a picture such as introduction of a picture, uses of prepositions and so on. After that, the students learned the differences between describing a picture and poster/flyer. They needed to imagine they were from a student association when describing a poster and they were assisting international students to know how to go to a certain college.
